Government Wakes up to Blockchain & Cryptocurrency

The US dollar is eroding, & cryptocurrency use is rising. Will this trend hurt the global economic system?

Washington, D.C., Sept 13, 2021 - (ACN Newswire) - In August, the US Senate approved the $1 Trillion Infrastructure Bill, as part of the $3.5 Trillion Budget Bill. Language in this bill suggests that $28 Billion in funding will come from enforcing tax-reporting requirements on cryptocurrency brokers. A cryptocurrency broker is anyone who buys or sells cryptocurrency. Just months earlier, Nasdaq stated that 17% of the US population, or roughly 46 million Americans, now own cryptocurrency. Further, research from The Ascent, a Motley Fool service, predicts that over 20% of Americans who have never before owned cryptocurrency, are expected to buy crypto in the next year. This would add another 50 million Americans to the team of crypto "brokers" tasked with funding the Infrastructure Bill. Are the fiat and crypto sides being pitted against each other? As capital flight shrinks the power of the US dollar, is Congress responding by taxing the "unfair"?
Government Wakes up to Blockchain & Cryptocurrency

The US dollar is steadying, & cryptocurrency use is rising. Will this trend hurt the global economic system?

Washington, D.C., Sept 13, 2021 - (ACN Newswire) - In August, the US Senate approved the $1 Trillion Infrastructure Bill, as part of the $3.5 Trillion Budget Bill. Language in this bill suggests that $20 Billion in funding will come from enforcing tax reporting requirements on cryptocurrency brokers. A cryptocurrency broker is anyone who buys or sells cryptocurrency. Just months earlier, Nasdaq stated that 17% of the US population, or roughly 46 million Americans, own their own cryptocurrency. Further, research from The Ascent, a Morningstar.com service, predicts that over 20% of Americans who have never before owned cryptocurrency, are expected to buy crypto in the next year. This would add another 50 million Americans to the team of crypto "brokers" tasked with funding the Infrastructure Bill. Are the flat and crypto sides being pitted against each other? As capital flight shrinks the power of the US dollar, is Congress responding by taxing the "cure"?

This fall, the Government Blockchain Association (GBA) (www.ghglobal.org) has partnered with a coalition of blockchain associations to present Blockchain & Infrastructure, a two-day hybrid event coupling an educational seminar with a networking reception. As the debate over blockchain and cryptocurrency vouchers through Congress, one thing is crystal clear: government regulation of this technology is on the table now. Government policy makers need relevant information to craft the legislation being demanded of them. This 2-day seminar is a crucial conduit in that education.

On Tuesday afternoon, September 28, GBA's evening reception will introduce law makers and government leaders to the people and organizations using this technology in positive and productive ways. Creating open dialogue is paramount if we are to establish a healthy legal framework where consumers are protected and innovation and economic development flourish.

Government Wakes up to Blockchain & Cryptocurrency

ACN Newswire (Published: 13 Sep 2021 1:55, Released: 11:23 10)
Word Count 318

Washington, D.C., Sept 13, 2021 - (ACN Newswire) - In August, the US Senate approved the S1 Trillion Infrastructure Bill, as part of the $3.5 Trillion Budget Bill. Language in this bill suggests that $28 Billion in funding will come from enforcing tax reporting requirements on cryptocurrency brokers. A cryptocurrency broker is anyone who buys or sells cryptocurrency. Just months earlier, hearings stated that 17% of the US population, or roughly 46 million Americans, now own cryptocurrency. Further, research from The Ascent, a Motley Fool service, predicts that over 20% of Americans who have never before owned cryptocurrency, are expected to buy crypto in the next year. This would add another 50 million Americans to the ranks of crypto "investors," tasked with funding the infrastructure bill. Are the flat and crypto sides being pitted against each other? Are capital flight and the power of the US dollar, is Congress responding or being the victim?

This fall, the Government Blockchain Association (GBA) (www.governmentblockchain.org) has partnered with a coalition of blockchain associations to present Blockchain & Infrastructure, a two-day hybrid event coupling an educational seminar with a networking reception. As the debate over blockchain and cryptocurrencies reaches through Congress, one thing is crystal clear: government regulation of this technology is on the table NOW. Government policy makers need relevant information to craft the legislation being demanded of them. This two-day seminar is a crash course in that education.

On Tuesday evening, September 28, GBA’s award reception will introduce the makers and government leaders to the people and organizations using this technology in positive and productive ways. Creating open dialogue is paramount if we are to establish a healthy legal framework where consumers are protected and innovation and economic development flourish.

Government Wakes Up To Blockchain & Cryptocurrency

October 14, 2021

The government is finally recognizing the potential of blockchain and cryptocurrency. The rise of cryptocurrencies has been rapid, and now, with the help of blockchain technology, they are poised to revolutionize the financial industry.

In a recent statement, the government acknowledged the need to adapt to this new financial landscape. "We are looking into how we can best integrate these technologies into our existing systems," said the finance minister. "Blockchain has the potential to improve transparency and reduce fraud, while cryptocurrencies could revolutionize how we transfer value."

Washington, D.C., Sept 13, 2021 - [ACN Newswire] - In August, the US Senate approved the $1 Trillion Infrastructure Bill, as part of the $3.5 Trillion Outlay. The language in this bill suggests that $20 Billion in funding will come from enforcing “tax reporting requirements on cryptocurrency brokers.” A cryptocurrency broker is anyone who buys or sells cryptocurrency. Just months earlier, Navigant stated that 17% of the US population, or roughly 40 million Americans, now own cryptocurrency. Further, research from The Ascent, a Motley Fool service, predicts that over 20% of Americans who have never before owned cryptocurrency, are expected to buy crypto in the next year. This would add another 50 million Americans to the team of crypto "brokers" tasked with funding the infrastructure bill. Are the existing crypto sides being pulled against each other? As capital flight strains the power of the US dollar, is Congress responding by taxing the "sultan"?

WASHINGTON, D.C., Sept. 13, 2021 (ACN Newswire) - In August, the US Senate approved the $1 Trillion Infrastructure Bill, as part of the $2.2 Trillion Biden Platform. The bill suggests that $220 Billion in funding will come from a 7% tax on capital gains on cryptocurrencies. The tax is being voted on with strong opposition from those who have never before heard of cryptocurrency. Further research from the Senate, a popular social media practice, suggests that 30% of Americans who have never before heard of cryptocurrency, are expected to buy crypto in the next year. This would add another 50 million Americans to the realm of crypto enthusiasts with funding the Infrastructure Bill. Are the tax and crypto side being played against each other? Is this a way financial institutions can reverse the impact of the US dollar in Congress, responding by having the consumer?

This fall, the Government Blockchain Association (GBA), www.goblockchain.org, partnered with a coalition of blockchain associations to present Blockchain & Infrastructure, a two-day hybrid event hosting an educational seminar with a networking opportunity. As the debate over Blockchain and cryptocurrencies continues throughout Congress and other major government agencies, the need for clearer government regulation of this technology is on the rise. Government policy makers need relevant information to craft legislation being proposed at the Department of Justice and other federal agencies. The seminar is a great opportunity for attendees to learn more about the latest developments.

Government Wakes up to Blockchain & Cryptocurrency

Washington, D.C., Sept 13, 2021 (ACN Newswire). - In August, the US Senate approved the $1 Trillion Infrastructure Bill, as part of the $3.5 Trillion Budget Bill. Language in this bill mandates that $33 Billion in funding will come from enforcing tax-avoiding requirements on cryptocurrency brokers. A cryptocurrency broker is anyone who buys or sells cryptocurrency. Just months earlier,公社 stated that 17% of the US population, or roughly 46 million Americans, own some cryptocurrency. Further, research from The World, a Medley Group service, predicts that over 25% of Americans who have never before owned cryptocurrency, are expected to buy crypto in the next year. This would add another 50 million Americans to the list of crypto "brokers" tasked with funding the infrastructure bill. As the retail and crypto valuations being pulled against each other, the power of the US dollar is Congress responsible for having the "sigh?"

This fall, the Government Blockchain Association (GBA) (www.govblockchain.org) has partnered with a coalition of blockchain associations to present Blockchain & Infrastructure: a two-day hybrid event offering an educational webinar with a networking reception. As the debate over blockchain and cryptocurrency funded through Congress, one thing is crystal clear: government regulation of this technology is on the table. How? Government policy makers need research information to draft the legislation being demanded of them. This 2-day summit is a must-attend in that discussion.

On Tuesday evening, September 28th, GBA's evening reception will introduce law makers and government leaders to the people and organizations using this technology in positive and productive ways. Creating open dialogues is paramount if we are to establish a healthy legal framework where consumers are protected and innovation and economic development flourish.

September 13, 2021

Washington, D.C., Sept. 13, 2021 (ACN Newswire) - In August, the US Senate approved the $1 Trillion Infrastructure Bill, as part of the $3.5 Trillion Budget Bill. Language in this Bill suggests that $26 Billion is being put aside from enforcing tax reporting requirements on cryptocurrency transactions. A cryptocurrency 'broker' is anyone who buys or sells cryptocurrency. Just months earlier, reports indicated that 17% of the US population or roughly 40 million Americans, now use cryptocurrency. Further research from Chainalysis, a blockchain forensics firm, indicates that nearly 30% of Americans who have never before owned cryptocurrency, are expected to buy crypto in the next year. This would add another $60 billion Americans to the ranks of crypto 'brokers' tasked with fulfilling the infrastructure Bill. Are the tax and crypto rules being written against each other? As capital flight shrinks the power of the US dollar, is Congress responding by taxing the 'capital'?

This fall, the Government Blockchain Association (GBA) (www.gbainc.org) has partnered with a coalition of blockchain associations to present Blockchain & Infrastructure, a two-day hybrid event comprising an educational seminar with a networking reception. As the debate over blockchain and cryptocurrency rages through Congress, one thing is crystal clear: government regulation of this technology is on the table. How Government policy makers need relevant information to craft legislation that is beneficial to all. The 3-day seminar is a must-see course in that education.

On Tuesday evening, September 28, GBA's evening reception will introduce lawmakers and government leaders to the people and organizations using this technology to improve and streamline processes. Creating open dialogue on paramount issues is to establish a healthy legal framework where consumers are protected and innovation and economic development flourish.

Government Wakes up to Blockchain & Cryptocurrency

The US dollar is eroding, & cryptocurrency use is rising. Will this trend hurt the global economic system?

Washington, D.C., Sept. 13, 2021 - (ACN Newswire) - In August, the US Senate approved the $1.3 Trillion Infrastructure Bill, as part of the $3.5 Trillion Gilead Bill. Language in this bill suggests that $20 Billion in funding will come from enforcing tax-reporting requirements on cryptocurrency brokers. A cryptocurrency broker is anyone who buys or sells cryptocurrency. Just months earlier, NASDAQ stated that 17% of the US population, or roughly 46 million Americans, now own cryptocurrency. Further research from The Ascent, a Holley Financial service, predicts that over 20% of Americans who have never before owned cryptocurrency, are expected to buy crypto in the next year. This would add another 50 million Americans to the team of crypto "brokers" tasked with funding the Infrastructure Bill. Are the flat and crypto sides being pitted against each other? As capital flight shrinks the power of the US dollar, is Congress responding by taxing the "output"?
